**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 20-32, drawn to a method of manufacturing a coated part.

Group II, claim(s) 33-38, drawn to a coated part.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Evidence of lack of utility between the groups is found in WO 98/31524 which discloses the features of claim 33, namely that the edges of the secondary layer are located in grooves in the final part which correspond to the outline of the secondary layer and hide the edges.(Figure 4) Therefore, the special technical features of the claimed invention are not found to define a contribution over the prior art, and no single inventive concept exists. Therefore restriction is appropriate.

3. A telephone call was made to Ben Castel on 2/24/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Barbara J. Musser** whose telephone number is **(571)**
